

Work Stress Calculation

Inputs

A. Workload Fields (Daily)

- Task Completed (count or list)
- Due Date (to check overdue)
- Pending Tasks (number)
- Time Taken per Task (minutes/hours)
- Task Priority (High / Medium / Low)

B. PSS-10 Questionnaire

- 10 validated questions
- Answered based on past 24 hours (not week/month)
- Scale: 0 = Never → 4 = Very Often

Process

1. Calculate PSS Score:

- Reverse score Q4, Q5, Q7, Q8
- Total out of 40
- Normalize to **0–10** scale

$$\text{normalized_pss} = (\text{pss_score} / 40) \times 10$$

2. Calculate Workload Stress (FTE method):

- Calculate total hours worked = sum of time taken for all tasks
- Divide by FTE standard = 7.22 hrs
- Apply stress penalty:
 - $\leq 7.22 \rightarrow 0$
 - 7.23–9 hrs $\rightarrow +0.5$
 - 9.01–12 hrs $\rightarrow +1.0$
 - 12 hrs $\rightarrow +2.0$

$$\text{workload_stress_score} = 0.0 - 2.0$$

3. Final WorkStress Score Calculation:

$$\text{final_stress_score} = (\text{normalized_pss} \times 0.6) + (\text{workload_stress_score} \times 0.4)$$

- Result is on a **0–10 scale**

Output

Field	Description
WorkStress Value	Final combined stress score (0–10)
Stress Level	Label (Low, Moderate, High, Critical) based on thresholds

Stress Level Example

Score Stress Level

0–3 Low

4–6 Moderate

7–8.5 High

8.6+ Critical

10 Simple Questions for Daily Stress Check
